THE LOGISTICS AIRFLOW CHALLENGE

Large high bay spaces are complex environments where heat builds up, airflow becomes uneven, and comfort can vary dramatically across the floor.

**PICKING AND
PACKING AREAS**

High activity zones generate heat and require consistent airflow for operator comfort and focus.

LOADING DOCKS

Frequent door openings introduce outside air, causing temperature swings and disrupting airflow patterns.

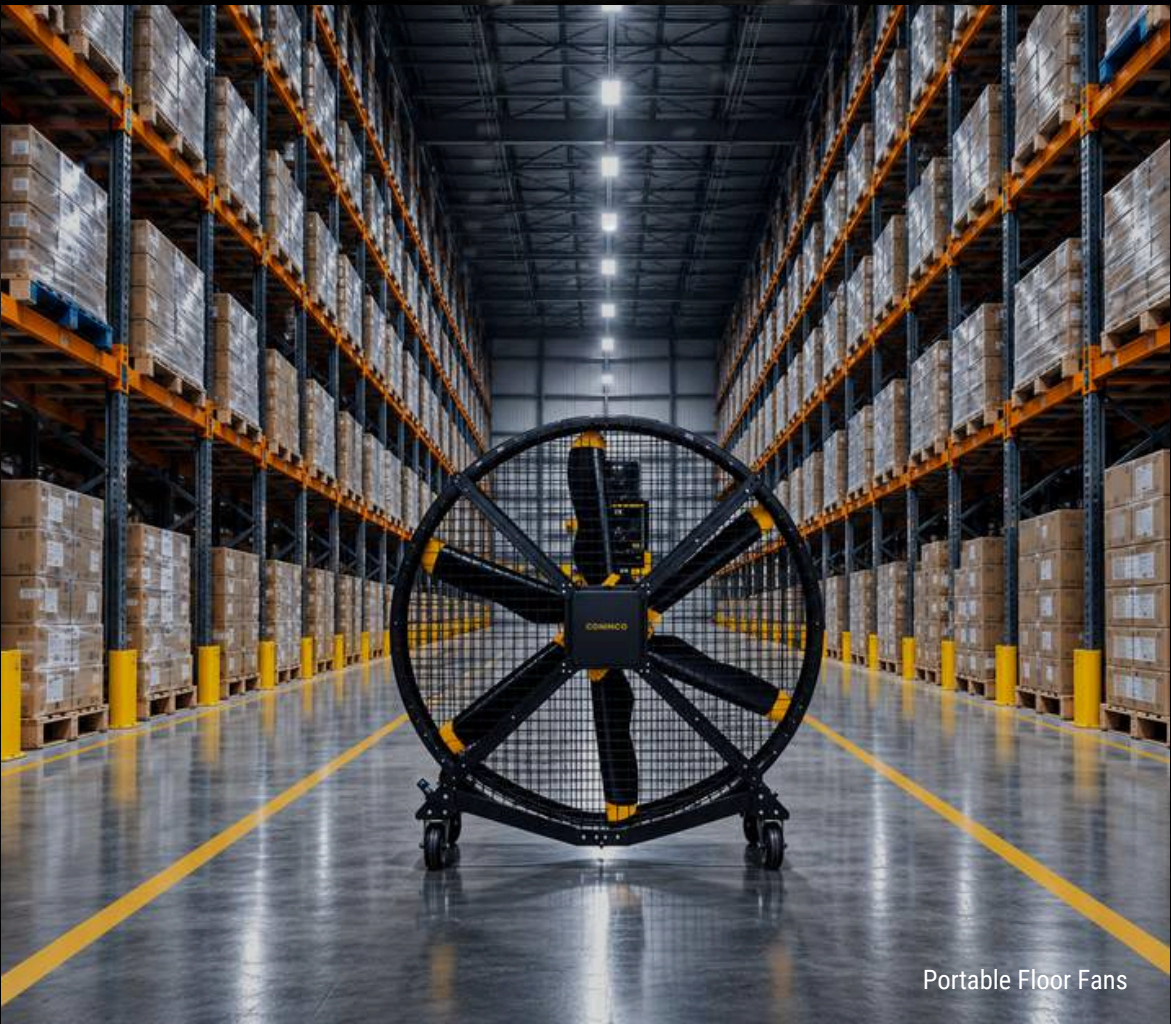

**CONTINUOUS PEOPLE AND
FORKLIFT MOVEMENT**

Constant movement adds heat and creates turbulence, making airflow harder to control.

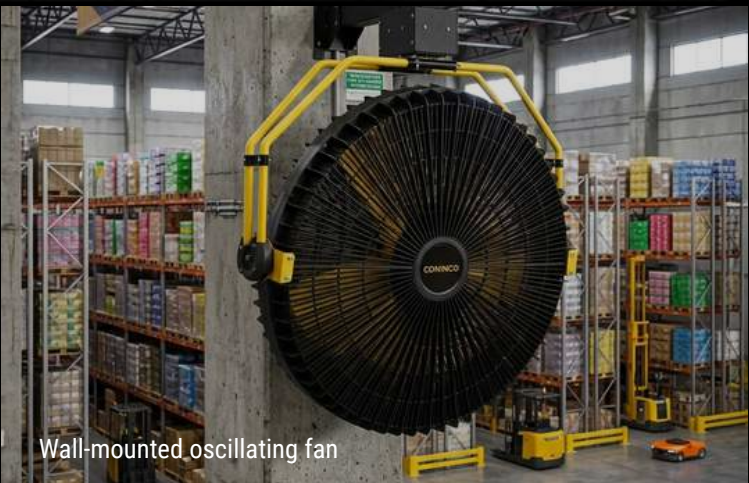

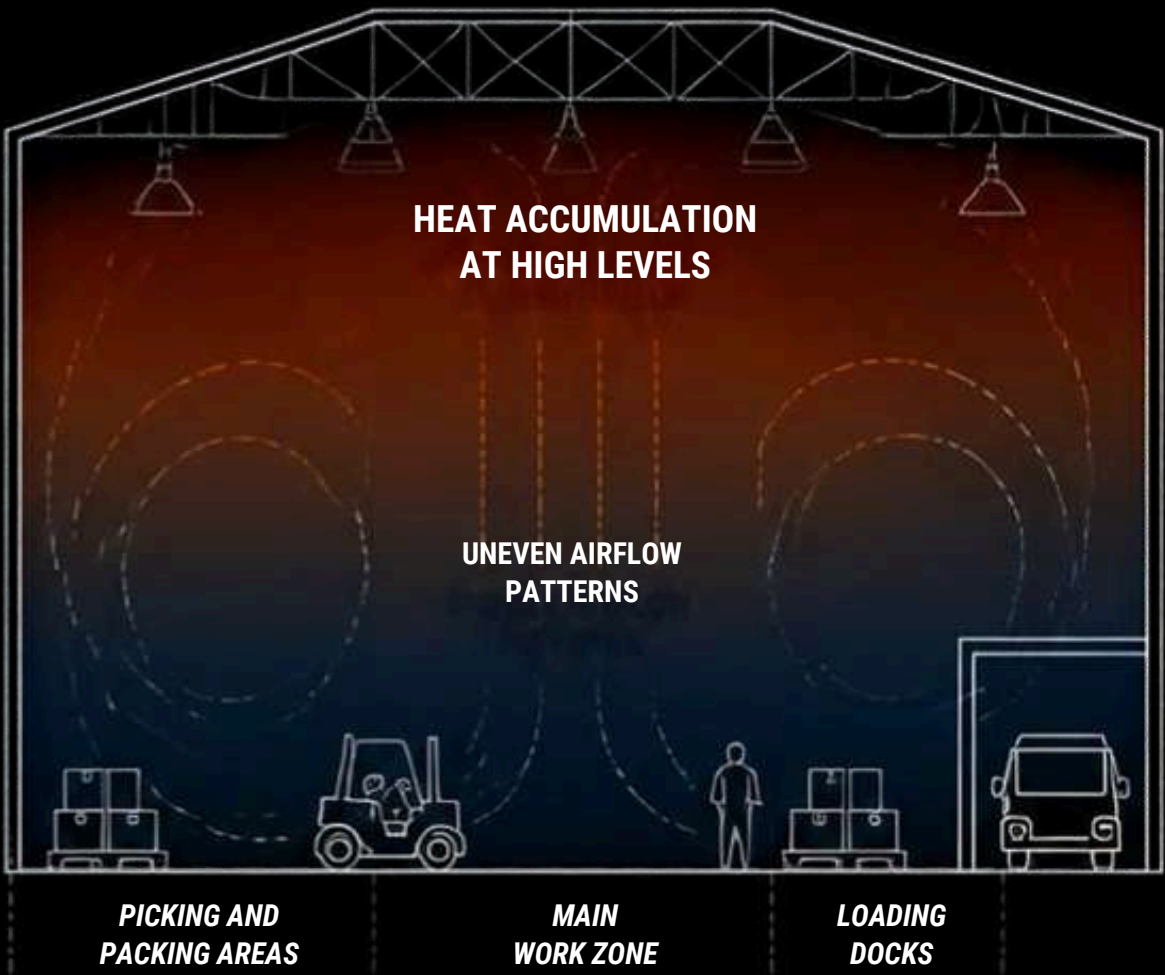

**DIFFERENT
OPERATIONAL ZONES**

Varied activities create different thermal loads and ventilation needs across the facility.

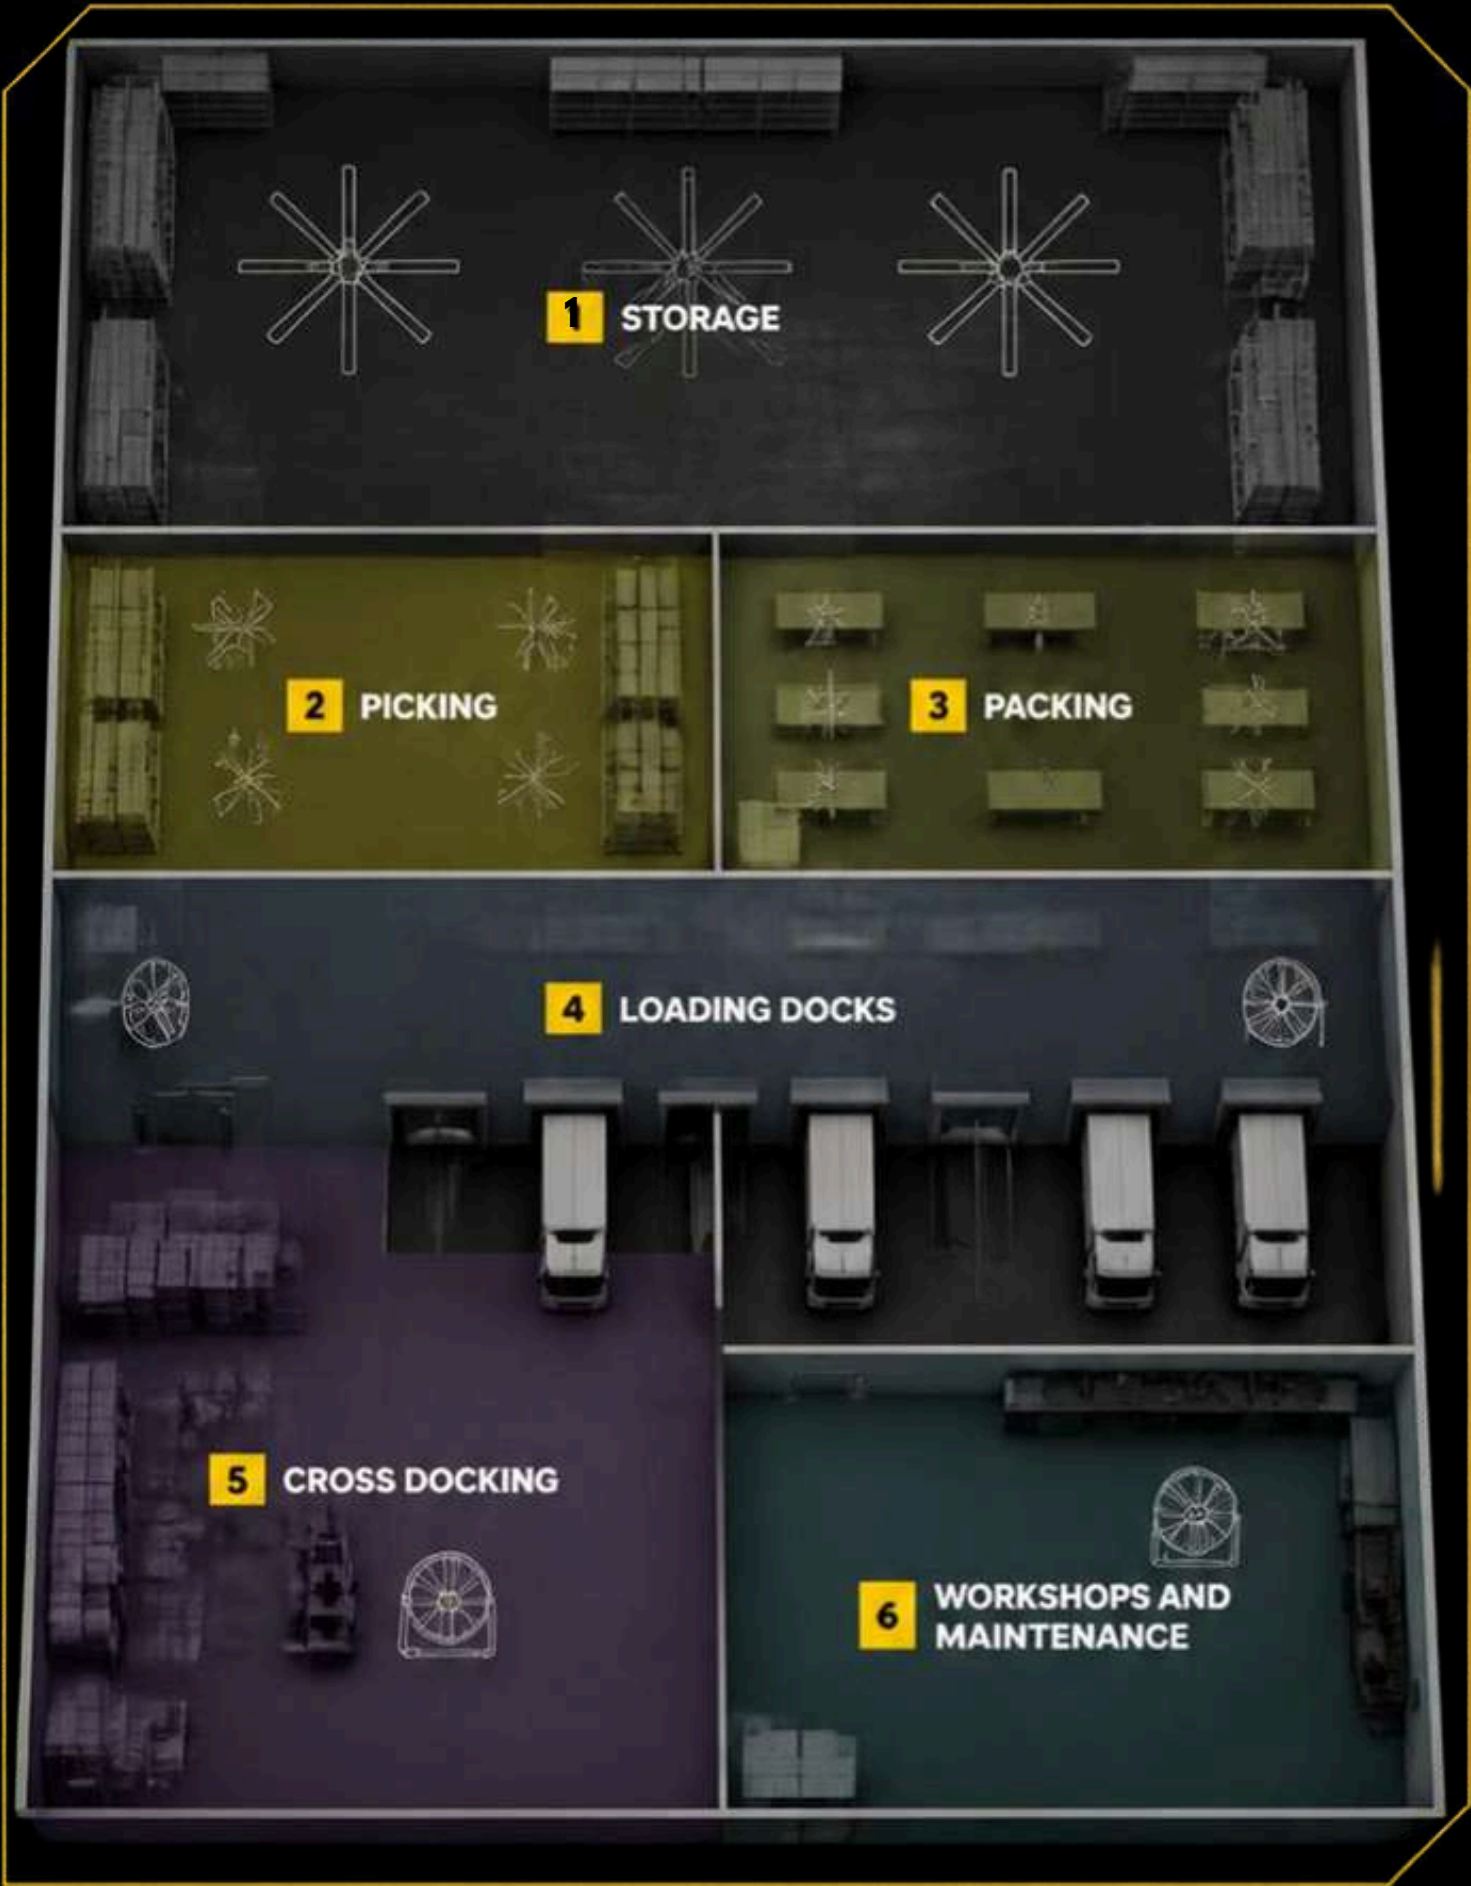

Portable Floor Fans

HEAT BUILD-UP AND UNEVEN AIRFLOW

Wall-mounted oscillating fan

AIRFLOW BY OPERATIONAL ZONE

Large Ceiling HVLS Fans -forlarge areas.

Deliver consistent, gentle air movement across wide spaces to improve comfort.

Wall Fans - for targeted airflow.

Provide focused air movement to specific areas where heat or congestion builds up.

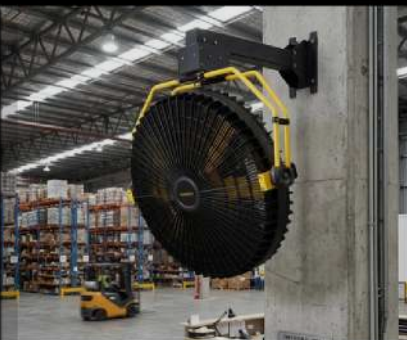

Portable Floor Fans - for flexible airflow.

Quick to deploy and reposition to adapt to changing tasks and conditions.

Right airflow. Right zone.

Match the CONINCO solution to each operational zone for effective, practical airflow where it is needed most.

CUSTOMER VALUE

CONINCO Fans Elevate Your Performance.
Smarter airflow delivers measurable performance, greater efficiency, and lasting value across your facility.

AIRFLOW – COMFORT – PEOPLE – PRODUCTIVITY – OPERATIONAL EFFICIENCY – BUSINESS VALUE

IMPROVED COMFORT
Consistent air movement helps regulate temperature and humidity for more comfortable working areas.

CONSISTENT AIRFLOW
Engineered air distribution delivers uniform airflow across operational zones, reducing hot spots and stagnant pockets.

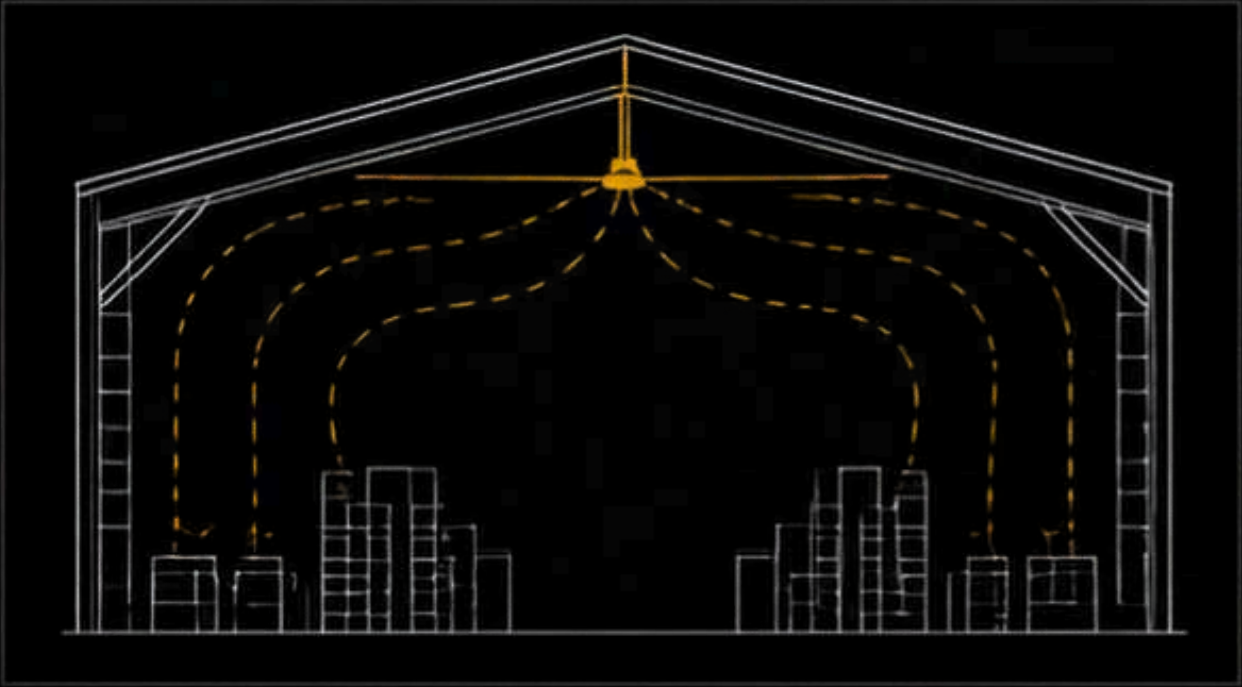

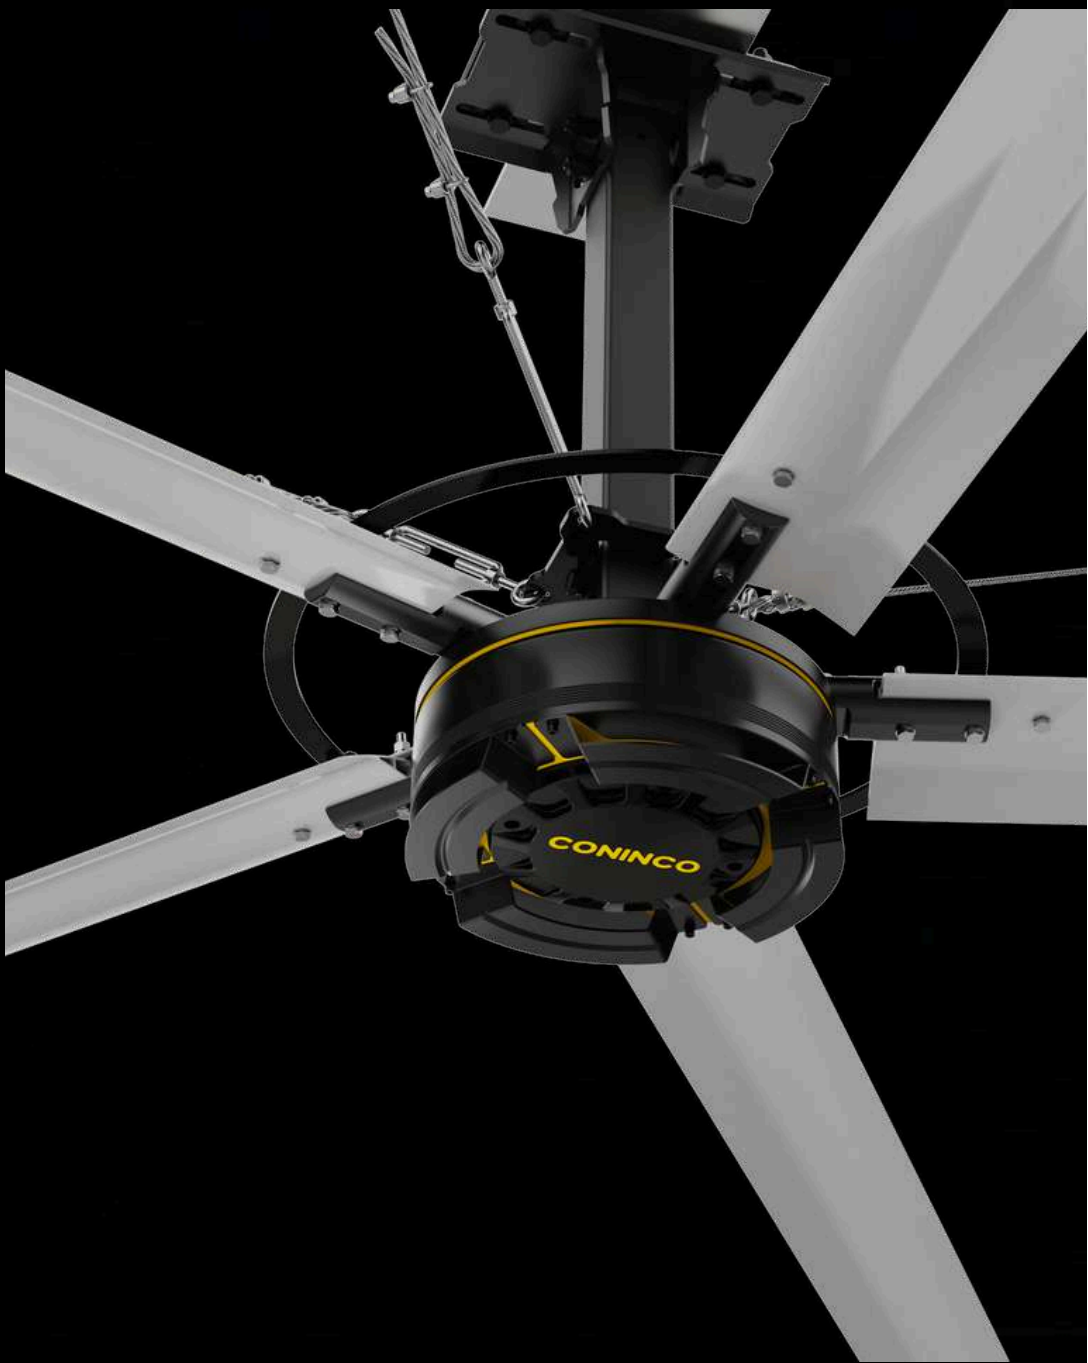

SUPPORTS PEOPLE
Reliable ventilation creates a safer and healthier environment for people working around the clock.

CLEARER AIRFLOW PLANNING
Predictable performance supports better airflow planning and more confident equipment decisions.

ADAPTABLE ENVIRONMENT
Flexible solutions adapt to changing layouts, processes and operating conditions.

DESIGNED FOR BETTER AIRFLOW

Large volume, low speed fans move air gently and evenly through the space, promoting consistent conditions from floor to ceiling.

POWERING COMFORT
ELEVATING PERFORMANCE

TRUSTED ACROSS DEMANDING INDUSTRIAL ENVIRONMENTS

From warehouses and distribution centres to manufacturing facilities and logistics hubs, CONINCO FANS provides powerful, reliable airflow for large-scale operations.

Designed to improve airflow consistency, enhance workplace comfort and support operational efficiency — wherever performance matters.

TRUSTED BY GLOBAL INDUSTRY LEADERS

Proven airflow solutions for demanding industrial, logistics and warehouse environments.

THE CONINCO FANS AIRFLOW SOLUTION

Ceiling HVLS Fans

High volume, low speed fans deliver gentle, consistent airflow to improve comfort and support energy efficiency across large spaces.

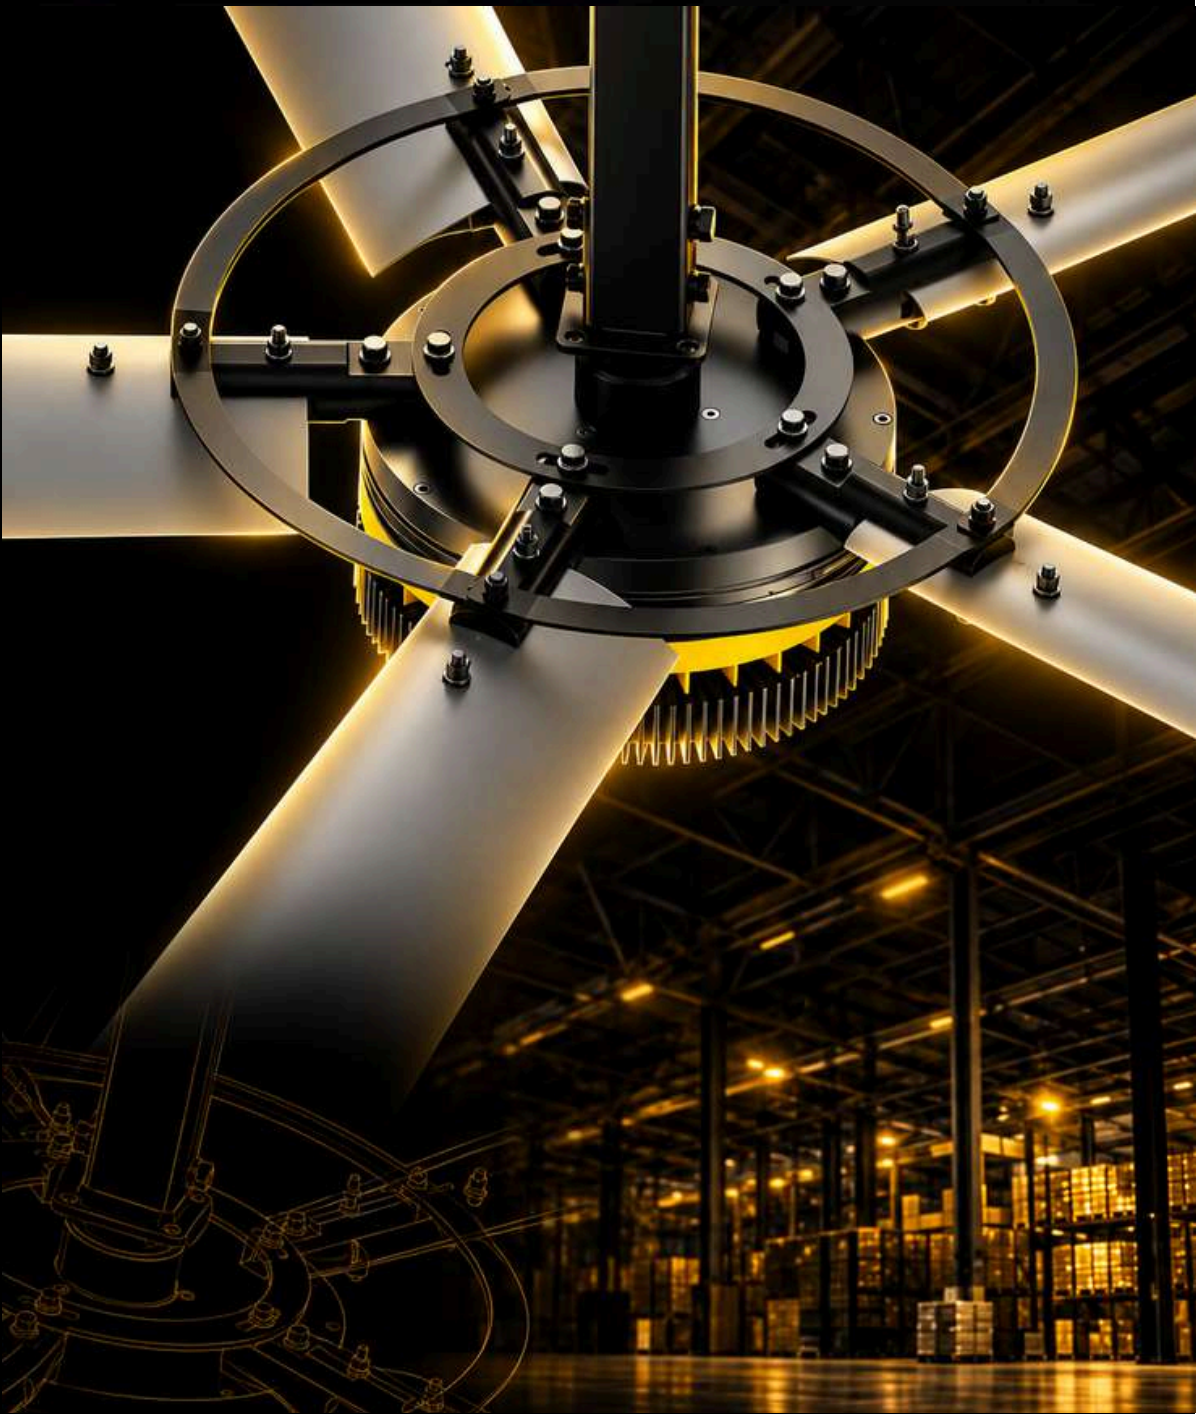

Wall Fans

Powerful directional airflow for targeted ventilation in high areas, loading zones and high heat environments.

Portable Floor Fans

Flexible, mobile cooling wherever it is needed. Easy to position and move for changing operational needs.

CONFIGURABLE OPTIONS

Smart Control

Central Control

Temperature and Humidity Sensing

Fire System Interlink

**KEEP YOUR PEOPLE
MOVING. KEEP YOUR
OPERATION MOVING.**

**SMART AIRFLOW FOR
SMARTER LOGISTICS.**
